

YOUR MISSION:
FIND THE BEST ROUTE

THE CHALLENGE IN DETAIL

SITUATION / USE CASES

Our riders want the best route while:

- #1 getting from A to B
- #2 riding around his current location for X hours

Focus on one or go for both!

YOUR MISSION

Provide the rider with the **best** route for his ride. By considering the following metrics:

- Usage of BMW Crowd Data
- Usage of BMW Personal Rider Data
- Usage of external Sources
- Scalability & Efficiency
- Calculation of Fun Score
- Consideration of Rider Safety

WHAT TO DEVELOP?

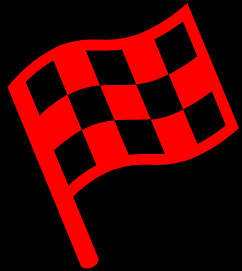

- the exact definition of „good route“ in your solution.
- an overview of all used data sources and how they are weighted and combined.
- a visual representation of the data and algorithm (e.g. Route Planning Tool)

AND THE RESULT?

- A dynamic solution to plan a route for one or two of the rider usecases with a maximum consideration of all success metrics.
- A presentation & showcase on the overall solution.

MOTORCYCLE RIDING IS NOT LIKE DRIVING A CAR

THINK OUTSIDE OF THE BOX – CHALLENGE YOUR IDEA OF NAVIGATION

RED FLAGS

Inner City
Standstills
Bad Weather
(Rain & Temperature)
Bad road conditions

GREEN FLAGS

Curves
High Lean Angle
50 < Speed > 120
Scenic views
Flow
Elevation
Clear Road View
